

LABORATORIUM  
**BUCHRUCKER**  
HYGIENE GmbH

**PRODUCTS**  
FOR END CUSTOMERS

## ABOUT US

Buchrucker was founded in 1896 by pharmacist Friedrich Buchrucker in Linz (Austria). At the beginning the main products were human preparations. Later he added pest control, inficin preparations, animal feed and vitamin preparations to the production process. 1970 he succeeded in gaining a foot hold in the Austrian dairy industry.

Since 1984 the company is situated in Ottensheim (Austria). Since 2009 the family business is refounded as a GmbH.

In 2015 Swen Herborn took over the company „Laboratorium Buchrucker Hygiene“ as it's director.

In 2018 the Buchrucker Hygiene GmbH in Schwäbisch Hall (Germany) was founded.

Tradition brings with it an obligation! More than 100 years experience and our satisfied customers stand for our quality. Convince yourself of our range of products.

**BUCHRUCKER**  
HYGIENE GmbH

We reserve the right to change our products and their specification as well as related user manuals, accompanying texts and documentation at all times and without advance notice, without obligation to report the change. Reg-Nr. N-42922

## BARRIER DIPING IODINE LACTIC ACID

- For effective protection of the teats after milking
- Forms after a short time a breathable, nourishing film
- Effectively protects against penetrating dirt.

Content	Art.No.	Price excl.
5 l	9090	28,70 €
20 l	9091	109,00 €
200 l	9092	929,90 €

**Use biocides safely.**  
Always read the label and product information before use.

Reg-Nr. N-76745

## 2-COMPONENTS DIPING

2-component dipping is mixed from activator and base 1:1 immediately before milking.

- 2-component dipping is recommended if:
- Cell count is higher than 200,000
  - Cases of mastitis infections are higher than 15%
  - Mastitis is mainly caused by infectious bacteria

The 2-component dipping consists of:  
20 kg activator and 20 kg base

Art.No. 7100  
Price excl. 214,55 €

**Use biocides safely.**  
Always read the label and product information before use.

Reg-Nr. N-76729

## BUCHRUCKER UDDER PASTE

The udder paste is a natural cream for cooling the udder based on natural clinoptilolite.  
In principle, it is a further development of the proven home remedy of acetic alumina.

The paste has the following functions and advantages:

- Bind excreted pollutants
- Cools the udder
- Supports the healing process
- BIO suitable
- Free of chemical and pharmaceutical agents
- No influence on milk taste
- Protection against infections
- supports the healing process
- no waiting time

3 kg  
Artikel No. 3082  
Price excl. 25,65 €

**Application:**  
Apply the paste to the blanched udder and repeat twice if necessary

## MINTBALM

Natural care balsam based on peppermint oil and pharmaceutical Vaseline.

Prevents udder complaints and protects the udder  
Dryness and cracks

Description	Content	Art.No.	Price excl.
Hanging bottle	500 ml	2004	15,35 €
Refilling Can	5000 ml	2003	108,05 €
Dosing pump for canister	1 Piece	3036	3,00 €

## DR. KELLERS MILKING FAT WITH AZULENE

Excellent treatment for udders and hands.

Description	Content	Art.No.	Price excl.
with Azulene	500 ml	2161	4,45 €
with Azulene	1000 ml	2165	8,05 €

## LABU MILKING FAT PURE VASELINE

Pure vaseline in pharmacopoeial quality.

Description	Content	Art.No.	Price excl.
pure Vaseline	500 ml	2163	4,00 €

## LABU MILKING FAT WITH MARIGOLD

With marigold extracts, vitamin E and beeswax.  
Particularly suitable for skin care.

Description	Content	Art.No.	Price excl.
with Marigold	500 ml	2162	7,75 €

### INSEMINATION GLOVES

Disposable glove ideal for farmers and veterinarians.

- Length: 90 cm, extremely elastic
- Color orange
- Material thickness: 30 microns

100 Pieces  
Art.No. 2160  
Price excl. 18,00 €

### MILKING GLOVES NITRIL

Gloves in different sizes.  
50 Pieces per Pack

Size	Art.No.	Price excl.
S	8024	12,35 €
M	8021	12,35 €
L	8022	12,35 €
XL	8023	12,35 €

### MILK FILTER HOSES

Different sizes. 250 Pieces per Pack

Description	Art.No.	Price excl.
250 x 57	8100	14,60 €
320 x 57	8101	17,20 €
455 x 57	8102	24,20 €
500 x 57	8103	25,00 €
530 x 57	8104	27,50 €
620 x 57	8105	28,10 €

Our matching equipment can be perfectly combined with the other products!

### DIPING CUP GREEN

Suitable for all foam-forming dip agents, as well as for the pre-cleaning of the udder in connection with the udder cleaner.

Art.No. 2128  
Price excl. 9,80 €

### DIPING CUP ORANGE

Suitable for all barrier dip products.

Art.No. 2127  
Price excl. 9,15 €

### DIPING CUP RED

Suitable for all liquid dip media

Art.No. 2126  
Price excl. 9,15 €

### CALF DRINKING

#### BUCKET

made of plastic with metal strap including valve, red vacuum and suspension plate.

- acid resistant
- food safe
- cadmium free
- two flat sides
- Content: 8 liters

Art.No. 2150  
Price excl. 9,35 €

### ANIMAL WASH

Especially economical in use.  
(1 - 2% solution)  
Dissolves all animal-specific contaminants of the coat and skin of the animals.

5 l  
Art.No. 5055  
Price excl. 43,95 €

### VET-GEL

Liquid lubricant for vaginal and rectal examination of barks or other farm animals.  
Can also be used to assist with births or other procedures.

1.000 ml  
Art.No. 5056  
Price excl. 5,05 €

### HAND DIPING SPRAYER

For liquid, sprayable dipping.  
500 ml bottle contents.  
High quality quality spray head with metal nozzle. Angled spray head for optimal, precise spray dipping.  
Content is enough for about 50 cows.

Art.No. 2125  
Price excl. 10,50 €

### SPRAY- AND DIPING CUP

Oneway. No backflow of the dip solution into the dip cup possible. Thus, contamination of the solution is prevented.

Art.No. 2121  
Price excl. 4,85 €

### EURO DIPING CUP

Dipping cup with lid closure. Suitable for all liquid dipping.

Art.No. 2120  
Price excl. 4,95 €

## LABU-MARK ANKLE STRAP

LABU-MARK ankle strap is a soft, durable plastic tape for frequent use. The ankle straps can be opened without tools, are easy to label and easy to clean.

Content	Art.No.	Price excl.
orange (antibiotic treated cows)	2180	2,00 €
yellow (dry standing cows)	2185	2,00 €
green (suckler cows)	2190	2,00 €
blue	2195	2,00 €
<b>Set consisting of:</b> 5 x ankle strap yellow 5 x ankle strap orange 1 felt pen 1 key	2199	19,55 €

## MILK SAMPLING SET WITH CONSERVATION

For a quarter-milk sample examination consisting of:  
- 4 sterile, labeled tubes including stabilizer  
- 2 disinfection wipes  
- Form of the udder health service (must be provided)  
Packed in box with sampling instructions, addressed to the desired recipient.

Art.Nr. 2300  
Price excl. 4,30 €

Also available without conservation!  
Art.Nr. 2310 / 3,90 €

## LABU BOX

### FIRST EQUIPMENT

For a quarter-milk sample examination consisting of:  
- Thermobox with instructions  
- 3 cooling batteries  
- Tripod with 40 color-sorted, sterile sampling tubes incl. stabilizer

Art.Nr. 2350  
Price excl. 36,00 €

### REFILLING PACK

Consisting of:  
Tripod with 40 color-sorted, sterile sampling tubes incl. Stabilizer

Art.Nr. 2360  
Price excl. 23,35 €

## SCHALM TEST SOLUTION

To determine the cell content of fresh cow's milk.

Content	Art.No.	Price excl.
500 ml	2060	3,20 €
1000 ml	2020	3,90 €
5000 ml	2025	17,60 €

## SCHALM TEST DISPENSER

Handy Schalmtest canister with 3 ml dosing pump, filled with 500 ml schalm test Solution to determine the cell content of fresh cow's milk.

Ensures the exact compliance of the mixing ratio between milk and test solution. Allows an exact evaluation.

500 ml  
Art.No. 2065  
Price excl. 7,10 €

Also available as a set:

- Dispenser with 3 ml pump
- Schalm test shelle Super
- Schalm test protocol
- Pen

Art. No. 2070 / 19,35 €

## SCHALM TEST SHELL

Optimal design with large shell diameter. Also allows detection of low levels of reaction.

Art.No. 2010  
Price excl. 4,00 €

## SCHALM TEST CONCENTRATE

Concentrate for self-production the schalm test solution to determine the cell content of fresh cow's milk.

Dilution: 1 part concentrate, 9 parts drinking water

Content	Art.No.	Price excl.
60 ml	2030	1,70 €
484 ml	2040	10,20 €
968 ml	2045	18,65 €
4840 ml	2050	82,45 €

## PREMELK CUP SUPER

Made of durable plastic with black control insert and large sieve surface to detect consistency changes of the milk.

Due to the graduation also usable as a measuring vessel.

Art.No. 2001  
Price excl. 5,05 €

## HOOF AND CLAW BALSAM

The claw balm contains an optimal active ingredient combination for hoof care and regeneration of the horny substance.

Description	Content	Art.No.	Price excl.
Claw Balm GREEN syringe	60 ml	5022	7,20 €
Claw Balm GREEN	250 ml	5023	16,45 €
Claw Balm GREEN cartridge	300 ml	7002	20,90 €
Claw Balm WHITE syringe	60 ml	7006	3,80 €
Claw Balm WHITE	250 ml	7014	14,30 €
Claw Balm WHITE cartridge	300 ml	7012	25,30 €
Claw Balm WHITE squeeze	500 ml	7013	27,50 €

## 2-COMPONENTS CLAW GLUE

Description	Content	Art.No.	Price excl.
2-C Claw Glue	160 ml	2152	28,70 €
2-C Claw Glue	200 ml	2155	30,80 €
Mixing cannulas for 160 ml	10 Pcs.	2153	8,55 €
Mixing cannulas for 200 ml	8 Pcs.	2156	10,10 €
Pistol for 160 ml	1 Piece	2141	42,30 €

Glue pistol for easy dosing.

## HOOF CARE SPRAY GREEN

The green hoof care spray is for all clawed and hoofed animals suitable and can be easily apply by the spray pump. The claw care spray penetrates deeply, adheres well, dries quickly and forms a durable protective film.

Without propellant. With ultra-strong adhesion.

Description	Content	Art.No.	Price excl.
Spray bottle	500 ml	7003	14,95 €
Spray bottle incl. Spray head	500 ml + 1 Piece	7007	6,35 €
Spray head	1 Piece	7005	11,05 €
Canister	5 l	7004	118,35 €

New recipe!

## CLAW BATH

Reliable care of the claws by ionic copper solution.

Suitable for cows, sheep and goats.

Description	Content	Art.No.	Price excl.
Claw Bath	20 l	7040	195,00 €
Claw Bath	200 l	7041	1.795,00 €

Use biocides safely.

Always read the label and product information before use.

Reg-Nr. N-46087

## BEECH WOOD TAR

Thick and pure beech wood tar for claw care. Proven remedy for use after claw care.

1.000 g  
Art.No. 7010  
Price excl. 7,30 €

## HOOF AND CLAW CARE SET

Fast-curing 2-component methyl methacrylate Adhesive for claw and hoof treatment. Fast curing within approx. 3 - 8 minutes. After healing, the wooden block can be removed by means of pliers etc.

- Content:**
- Component A Liquid hardener 250 ml
  - Component B glue powder 375 g
  - 15 blocks
  - 15 spatulas
  - Measuring spoon 1 x red & 1 x blue
  - mixing cup

Art.No. 2151  
Price excl. 65,95 €

## CLAW KNIFE

High quality claw knife made of stainless steel for the professional claw care in the yard.

Description	Art.No.	Price excl.
Claw Knife Basic Right	8006	22,65 €
Claw Knife Basic Left	8018	22,65 €

50 Pieces	8036	23,55 €

## LABU HORSE

### HOOF BALM

The hoof balm contains an optimal active ingredient combination for hoof care and regeneration of the horny substance.

- suitable for all hoofed animals
- easy to apply
- Balm is pressed by a spindle directly into the brush tip
- penetrate deeply
- sticks well
- dries quickly
- forms a durable protective film
- promotes wet strength
- antibiotic-free formulation
- contains vitamin A, D3

Content	Art.No.	Price excl.
300 ml with brush	7002	20,90 €
60 ml in applicator	5022	7,20 €

Also available in a practical 60 ml applicator with dosing ring

### BF STANDARD HORSE

Technological feed additive especially for horses.

**Use:** Add BF Standard Horse to the daily feed ration. Maximum dosage: 10 g BF standard per kg Feed mixture (equivalent to 1%).

**Additive:** Clinoptilolite of sedimentary origin according to identification 1g568, clinoptilolite approved as feed additive according to Regulation (EC) No. 651/2013.

**Safety note:** Dust may be generated during processing. We therefore recommend the use of a dust mask. Further information can be found in our safety data sheet.

10 kg Eimer  
Art.Nr. 1087

### LABU HORSE REPELLENT PEN

Protects for up to 12 hours before:

- vermin; Fly; gnats; teal mosquitoes;
- ticks and other insects

LABU Horse Repellent pen is easy and economical to use.

300 g (10 x 1)  
Art.Nr. 5005  
Price excl. 19,45 €

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-49363

## THE WELLBEING OF ANIMALS IS OUR PRIORITY

Successful livestock farming does not only mean breed and adjusted keeping, also the further components of **hygiene** and **high-quality feeding** are essential.

To meet these requirements, we have **multiple certifications** to provide you and your animals with premium quality

OUR PRODUCTS ARE CERTIFIED WITH:

### LABU-SAN

Liquid, GMO-free supplement feed with glycogen substances for cattle, sheep and goats.

#### Use when:

- milk yield decreases
- cows have a low fertility
- animals are affected by lacking appetite
- cattle is licking or chewing on objects
- there is a high risk of disease in the herd
- animal's breath smells like acetone
- animals show a loss of condition
- animals are irritable

With the use of Labu San, the appetite and vitality of the animal comes back within 8-10 days.

LABU SAN can be administered directly or with mash or silage. In any case the infected animal must receive LABU SAN entirely.

LABU SAN has also proven it's worth for animals with high fat deposits. It's crucial to start with the use of LABU SAN on time, that means to set preventive measures for suspicious cows before they calve.

In case of higher energy demand, especially when there is a risk of getting infected with ketosis, use LABU SAN over a period of 1-2 weeks.

 Cattle daily 400 g

 Sheep and goats daily 100 g

Energy content: NEL 7,16MJ / kg in TM  
ME 11,78MJ / kg in TM

Content	Art.No.	PU	Price excl.

25 kg	1021	1	68,85 €
250 kg	1022	1	629,45 €

## MOLASSES

Molasses is a syrupy, dark brown by-product of sugar production and contains about 42% sugar and organic acids such as betaine.

The tasty feed is ideal for quick energy intake and can therefore be used as a supplement in cattle, horse, pork and poultry feed.

Molasses improves the taste and dust retention of the mixed or roughage. This positively influences the feed intake.

This product is a fast fermentable source of energy for the rumen microorganisms.

Content	Art.No.	PU	Price excl.
25 kg	1095	1	23,55 €
250 kg	1096	1	163,60 €
1200 kg	1097	1	771,75 €

- Dairy:**
- positive influence on the milk protein content
  - can increase the milk yield
- Pig:**
- only from a live weight of nca. Insert 40 kg
- Horse:**
- Delicacy
  - valuable supplementary feed

## HORSERADISH POWDER

- strengthens the immune system
- is used to prevent respiratory diseases
- contains natural antibiotic
- supports less failure
- helps to improve the fertility of sows

Content	Art.No.	PU	Price excl.
4 kg	1075	1	61,35 €
25 kg	1076	1	383,30 €

## DR. KELLERS DIGESTION OIL

Food-additive feed supplement based on essential oils. Promotes feed conversion and facilitates feed changes.

**Cattle:**  
10 to 20 ml (10 ml = about 1 tablespoon) before expelling or feeding.  
If necessary, pour 200 ml to 400 ml all at once.

**Sheep and goats:**  
1.0 - 3.0 ml (3 ml = about 1 teaspoon) before expelling or feeding.  
If necessary, pour 25 ml to 50 ml all at once.

Content	Art.No.	Price excl.
1000 ml	1030	12,65 €
5000 ml	1041	51,85 €

## TOPINPUR

For a good start to life of your calves from the 2nd day of life or after discontinuing the biestmilk.

- TopinPur is:**
- a pure natural product
  - certified organic (AT-BIO-402)
  - listed in the resource catalog for organic farming in Austria, compiled by InfoXgen.

Through the use of TopinPur diarrhea and colic can be combated within a few days and in a natural way.

In addition, an improvement of the general state of health and the immune system can be brought about in the long term.

Metabolic disorders of all kinds are favorably influenced. TopinPur is used for efficient intestinal and digestive remedies, as well as for prophylaxis.

## MONO PROPYLENE GLYCOL

Propylene Glycol (Monopropylene Glycol) is a product primarily used for ketosis prophylaxis in high-performance cows. It also acts as a synthetic energy carrier and has a dust-binding effect. In addition, propylene glycol also has a preservative effect.

The ketosis (acetonemia, acetonuria) in high performance cows is based primarily on an energetic undersupply of cattle during and shortly after calving. About the feed can usually not be covered the high energy demand, which at the beginning of lactation with high milk yield. The result is low formation of propionic acid in the rumen and reduced blood sugar formation.

Propylene glycol serves to maintain or increase the blood sugar level and thus prevent and treat the ketosis and the associated problems of health and performance of the animals.

**Application:**  
For ketosis prophylaxis and treatment: administer at least 150 g per animal per day (2 weeks before to 4 weeks after calving).

# CLINOPTILOLITE - ZEOLITE

Clinoptilolite is a natural mineral with exceptional physical properties resulting from its unique crystal structure. The clinoptilolite is a framework silicate from the group of zeolites, with a very high internal surface area of a few hundred square meters per gram.

Due to this high and very active surface of the clinoptilolite has a high Absorbptions- and ion exchange capacity. In practice, this means that toxins are absorbed and nutrients are released in exchange.

Many pollutants have a much greater ability to bind than nutrients. Unlike phyllosilicates, clinoptilolite has a selective binding property.

This means that this binding takes place in a defined order. Clinoptilolite absorbs: ammonia, heavy metals, radionuclides, odorous gases and water.

## In summary, the following results Properties:

- high ion exchange selectivity
- reversible hydration and dehydration
- high gas sorption capacity
- high thermal stability
- Resistance to aggressive media

## This results in the following effects:

- Binding of pollutants and their discharge
- The large surface is used by microorganisms as Regulation of digestion
- Inhibition of odors
- binding of nitrogen
- Upgrading the manure

## BF STANDARD

BF Standard is a technological feed additive for all animal species.

### Use:

Simply add BF Standard to the daily feed ration. Suitable for all species.

**Maximum dosage:** 10 g BF standard per kg feed mix (equivalent to 1%). Further dosing recommendations from your specialist book printer.

### Additive:

Clinoptilolite of sedimentary origin according to identification 1g568, clinoptilolite approved as a feed additive according to Regulation (EC) No. 651/2013.

### Safety note:

Dust may be generated during processing, so we recommend using a dust mask. Further information can be found in our safety data sheet.

The product BF Standard consists of about 85% clinoptilolite, a natural volcanic mineral of high purity. BF Standard makes good use of the feed materials used (in particular protein-rich and carbohydrate-rich concentrates), because thanks to their physico-chemical properties they can stabilize digestion and improve the utilization of nutrients.

### The positive effect of clinoptilolite is based on unique features:

BF Standard binds harmful and toxic substances such as ammonia, nitrates, nitrites and mycotoxins in the organism through sorption and ion exchange. Useful intestinal microbes get an optimal settlement area. One gram of the product leads to more than one billion additional microorganisms.

The added value is not finished with the feeding and leaving the feed. Together with litter and manure, a mature, valuable organic-mineral fertilizer is produced.

The bound nitrogen in the product is not washed out in the field like commercial fertilizer or released into the air, but is about microorganisms the plants as a valuable nutrient available.

Clinoptilolite remains as an active ion exchanger and nitrogen storage in the soil and fully functional. Clinoptilolite meets the requirements of the EU animal feed law (EC Regulation 1810/2005, animal feed additive) and is approved and registered under „flow aids, binders and coagulants“.

Product	Content	Art.No.	Price excl.
BF Standard	25 kg	1080	13,90 €
BF Standard dust reduced	25 kg	1090	14,95 €
BF Standard extra fine	25 kg	1083	15,95 €
BF Standard dust free	25 kg	1081	14,40 €
BF Standard ultra fine	15 kg	1094	32,95 €
BF Big Bag	500 kg	1085	by request

The clinoptilolite has exchangeable ions such as potassium, magnesium or calcium. These ions are selectively exchanged for other cations. Above all, ammonium and heavy metals are bound. This property makes the clinoptilolite extremely interesting for agriculture.

### Your advantages:

- 100% organic
- Easy to use
- InfoXgen and FiBL listed
- No health risks for humans and animals
- Upgrading the manure
- Good feed conversion
- binding of toxins
- binding of moisture
- Less exposure to flies
- Clinoptilolite remaining in the soil improves soil structure and water / air exchange
- Lower feces moisture

## VM 50 STABLE BEDDING

Stable bedding in case of infestation by the red bird mite VM 50 works by contact of the red bird mite with the sharp-edged grain. This causes damage to the wax layer and the mite dries out.  
No overdosage possible. Biodegradable.

### Application and dosage:

Sprinkle VM 50 dry on critical surfaces. Distribute approx. 10 kg VM 50 evenly over 100 m<sup>2</sup>. Can also be used as a sand bath.

### Ingredients:

Natural aluminosilicate. Contains Al, Si, Na, K, Ca, Mg.  
Starting material: Natural Clinoptilolite

### Instructions for proper use:

VM 50 is 100% natural and is disposed of together with the remaining stable bedding.

Description	Content	Art.No.	Price excl.
VM 50	10 kg	3085	18,00 €
VM 50	25 kg	3083	31,70 €

### Your advantages:

- 100% organic
- Easy to use
- InfoXgen listed
- No health risks for humans and animals

## STABLE BEDDING DRY POWDER

Highly effective dry litter powder for more dryness and improved hygiene in the barn.  
Suitable for pigs, cattle, horses and poultry.

Reliably binds liquids through the minerals used and thus ensures rapid drying of all lying surfaces in the barn.

### TOP stable bedding:

- improves air quality
- the litter thus favours the development of the animals
- can hold up to 4 times its own volume
- may be used in occupied stables

The product does not settle in the slurry.

Description	Content	Art.No.	Price excl.
TOP stable bedding	1000 kg	1093	303,60 €

### Application:

- suitable for pork, beef, horse and poultry
- suitable for use in farrowing houses
- 30 g - 200 g/m<sup>2</sup> depending on contamination

## BF BIOGAS

BF Biogas is a technological additive for biogas plants. BF biogas is placed with the substrates in the fermenter of the biogas plant. The dosage should be discussed with your Buchrucker consultant.

**Starting material:** clinoptilolite of sedimentary origin. No dangerous ingredients included.

**Safety note:** Dust may be generated during processing. We therefore recommend the use of a dust mask.

Further information can be found in our safety data sheet

### Your advantages:

- 100% organic
- Easy to use
- InfoXgen listed
- No health risks for humans and animals

Description	Content	Art.No.	Price excl.
BF Biogas	25 kg	1082	13,90 €

## INFICIN FLYING KILLER BOX

The Inficin fly killer box is an efficient system for the complete destruction of flies in the house, yard and stable.

- safe use
- acts as a feeding poison
- no load on the air

Can be kept active by ongoing water addition over a period of about 6 - 8 weeks. Sufficient for about 16 m<sup>2</sup>

180 g (PU 10 x 1)  
Art.No. 4005  
Price excl. 16,15 €

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-25871

## INFICIN VINEGAR KILLER BOX

The Inficin vinegar fly killer box is an efficient system for extensive vinegar fly killing. Also works against resistant flies.

- safe use
- acts as a feeding poison
- no load on the air

Can be kept active by ongoing water addition over a period of about 6 - 8 weeks. Sufficient for about 16 m<sup>2</sup>

180 g (PU 10 x 1)  
Art.No. 4004  
Price excl. 16,15 €

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-25872

## LABU REPELLENT PEN

Protects for up to 12 hours before:

- vermin
- Fly
- gnats
- teal mosquitoes
- ticks and
- other insects

LABU Repellent pen is easy and economical to use.

300 g (PU 10 x 1)  
Art.No. 4020  
Price excl. 19,45 €

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-50421

## INFICIN K.O.

Stable spray concentrate for pest control against:

- Flies
- mosquitoes
- gnats and
- similar vermin

Works immediately and permanently. 180 ml Inficin K.O. diluted with 15 l water is sufficient for 180 m<sup>2</sup> floor area.

180 ml (PU 10 x 1)  
Art.No. 4001  
Price excl. 23,15 €

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-30916

## INFICIN B 3000

Biological stable spray for nebulisation against resistant stable flies. Sufficient for a stable floor area of up to 3000 m<sup>2</sup>.

- suitable for organic farms
- InfoXGen listed

500 ml concentrate for dilution with water  
500 ml  
Art.No. 4045  
Price excl. 26,45 €

gelistet  
**InfoXgen**  
für Biobetriebe geeignet

## INFICIN FLY KILLER

Spray liquid concentrate against stable flies and larvae (insecticide - larvicide). To kill adult flies and to prevent the development of young flies.

1 litre Inficin Flykiller diluted with 4 litres of water is sufficient for up to 400 m<sup>2</sup> floor area.

5 l  
Art.No. 4002  
Price excl. 27,05 €

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-76754

### INDUSTRIAL CLEANER

Liquid intensive cleaning concentrate foam-based for land, municipal and forestry used vehicles and machines (Tractors, trailers, etc).

Effective cleaning performance through special surfactant combination also at synthetic oils and fats.

Content	Art.No.	Price excl.
5 l	9020	26,45 €
20 l	9021	96,95 €

### STABLE CLEANER

Liquid intensive cleaning concentrate for professional cleaning of livestock stables.

Effective cleaning performance with foaming power for cattle, pork and poultry houses. Organic fats can be successfully removed.

Content	Art.No.	Price excl.
5 l	9050	27,05 €
20 l	9051	97,95 €
200 l	9052	858,20 €

### CLEANER ALKALINE

Liquid intensive cleaning concentrate based on foam for operating and slaughter rooms, milking parlors and wine presses and all surfaces and equipment in food processing and production.

Solves stubborn dirt like feces, blood, protein and fats.

Content	Art.No.	Price excl.
5 l	9030	27,05 €
20 l	9031	97,95 €

### CLEANER ACID

Liquid intensive cleaning concentrate based on foam for operating and slaughter rooms, milking parlors as well as wineries and all surfaces and equipment in food processing and production.

Solves also rust, lime and urine incrustations.

Content	Art.No.	Price excl.
5 l	9040	29,25 €
20 l	9041	109,00 €

Matching equipment for easy dosing.

### FOAM CANNON

For processing foamable cleaners in conjunction with high pressure cleaner or steam cleaner (incl. Kärcher and Kränzle adapter).

Art.No. 6001  
Price excl. 91,60 €

Wap Alto Adapter  
Art.No. 6004

### DRAINAGE TAP

for canisters with thread DIN 45  
Art.No. 2063, Price excl. 5,45 €

for canisters with thread DIN 70  
Art.No. 2062, Price excl. 7,75 €

### ALKALINE MILKING SYSTEM CLEANER

Liquid, intensive cleaning-concentrate for the professional cleaning and disinfection of milking systems.

Milking system cleaner in powder form for the professional cleaning and disinfection of milking systems.

Description	Content	Art.No.	Price excl.
liquid	12 kg	9068	17,50 €
liquid	25 kg	9060	27,50 €
liquid	240 kg	9062	241,00 €
powder	25 kg	9061	51,35 €

Use biocides safely.  
Always read the label and product information before use.

Reg-Nr. N-42923  
Reg-Nr. N-51691

### ACIDIC MILKING SYSTEM CLEANER

Liquid, intensive cleaning-concentrate for the professional cleaning of milking systems.

Milking system cleaner in powder form for the professional cleaning of milking systems.

Description	Content	Art.No.	Price excl.
liquid	12 kg	9069	17,50 €
liquid	25 kg	9070	27,50 €
liquid	240 kg	9072	241,00 €
powder	25 kg	9071	51,35 €

### HYGIENIC TANK CLEANER

Intensive cleaner for tanks, surfaces and devices in the milk production. Strong cleaning and disinfecting power because of the special active-iodine-formula. Removes the protein film and prevents organic and anorganic deposits.

ready-to-use-concentration: 1-2 %

Content	Art.No.	Price excl.
5 Liters	9075	24,80 €
20 Liters	9076	87,05 €

Use biocides safely.  
Always read the label and product information before use.

Reg-Nr. N-46088

## HYGIENIC DESCALER

Concentrate in powder form for removing limescale on and in drinking lines in livestock farming, especially in turkey husbandry.

Special composition of resources for very gentle removal of limescale.

No need of mechanical cleaning with scrubbers. Very gentle to the material.

### Instruction:

Hygienic descaler should be used in a dipping method. After that, wash down with a high pressure cleaner.

**Dosage:** 3-5%, depends on the limescale

### For usage in milking systems:

Hygienic Descaler can be used as a descaling agent for milking systems which are equipped with „boiling-water-cleaning“.

**Dosage:** 1,4 kg Hygienic Descaler for 20 liters water.

Dose with 0,5 %.

Content	Art.No.	Price excl.
12,5 kg	9077	61,65 €

## PERACETIC ACID 15%

For cleaning teat rubbers and milking clusters.

**Dosage:** Dilute peracetic acid 15% at a ratio of 1 to 30 with cold water. After that, rinse intensively with cold water.

Content	Art.No.	Price excl.
20 kg	4080	59,90 €

## FORMIC ACID 75 %

Formic acid is particularly suitable for cleaning feeding places.

Formic acid prevents the development of molds in open and closed feed containers.

- extremely effective descaler
- high environmental sustainability
- biodegradable
- suitable for beekeepers

**Use biocides safely.**

Always read the label and product information before use.

Reg-Nr. N-76755  
Reg-Nr. N-76757

Content	Art.No.	Price excl.
1 kg	4065	7,95 €
5 kg	4060	19,65 €

## CORROSION PROTECTION WAX

Creates a waxy protective film.

- Extremely longlasting protective effect
- Great weather-resistance
- Simple usage
- Hardly no adhesion of dust
- Quick drying
- No need of diluting
- Removable with degreaser

Content	Art.No.	Price excl.
5 Liters	9029	39,00 €
20 Liters	9028	149,20 €

### Instruction:

Put the wax on the clean and dustfree metal surface.

Stir or shake well before use.

Removable with wax remover.

## PIPE CLEANER

Special cleaning-concentrate for organic soiling like:

- deposits from protein or yeast in feeding systems
- residues of algae and drugs in drinking lines in livestock farming

Content	Art.No.	Price excl.
5 Liters	9001	25,95 €
20 Liters	9000	93,55 €

## TILE CLEANER

Strong, acidic cleaning-concentrate for acid-proof surfaces in the agriculture.

It removes for example deposits from cider, grease, soiling and lime on tanks, tiles, etc.

ready-to-use-concentration: 2-10%  
Very short application time.

Content	Art.No.	Price excl.
5 Liters	9056	26,45 €
20 Liters	9055	97,95 €

Halamid® is effective against many bacteria and viruses related to intensive farming applications.

## GENERAL DISINFECTION RULES

Always remember that cleaning is a required preliminary step before disinfection to ensure the best results.

Without proper cleaning, dirt and organic matter protect microorganisms against the killing effect of the disinfectant, resulting in an incomplete operation.

Start by dry cleaning to remove most of the organic matter, followed by cleaning with water or a detergent solution. Once it is done, disinfect with Halamid®.

Halamid® is always applied as an aqueous solution: simply dissolve the Halamid® in clean water at the required concentration.

## SURFACES AND BUILDING DISINFECTION

Between production cycles, when the buildings are empty, clean thoroughly and then disinfect with a Halamid® solution. For spraying, use 0.3 L/m<sup>2</sup> of a Halamid® solution at a concentration of 0.5-1%.

**Nebulization and fogging** When the animal house is equipped with a water nebulization system, building disinfection with Halamid® solution fogged through this equipment proved not only to be very effective but also easy to apply and cost efficient. Fog a Halamid® solution at a concentration of 2-3% with a recommended volume of 40-50 mL/m<sup>3</sup>.

Despite a higher concentration needed this system remains economically attractive because of the low total quantity of Halamid® required to achieve an effective disinfection.

## TRUCK DISINFECTION

Trucks contribute significantly to transmission of diseases from farm to farm. Make sure all vehicles are well disinfected (including the wheels) with a 1% Halamid® solution prior entrance to the farm.

Halamid® is particularly interesting for this application as solutions are non corrosive to materials and the product is active even at low temperature.

## FOOTBATH

A footbath should be placed at the entrance of each building and everybody must use it. A 2% Halamid® solution is prepared and refreshed as often as needed (generally twice a week, but it depends on the soiling of the solution).

Halamid® is a registered trademark of axcentive SARL.

Description	Content	Art.No.	Price excl.
Halamid Sachet	5 g	2079	3,80 €
Halamid Box	20 x 5 g	2077	66,90 €
Halamid	1 kg	2082	29,90 €
Halamid	6 kg	2083	153,00 €
Spray Bottle	500 ml	6600	4,00 €

## WATER SYSTEM DISINFECTION

Safe drinking water is a very important parameter for the animal well-being and should not be overlooked.

When the building is empty, run a 0.5% Halamid® solution through the water system for 30 min and then rinse with clean water. Halamid® can also be used to disinfect drinking water. Refer to the relevant information on this specific application.

## MILKING EQUIPMENT DISINFECTION

Because of the high proportion of organic substances, milking equipment is the perfect place for fast germ growth. Therefore it must be disinfected carefully and frequently.

Firstly clean devices and equipment, after that apply a 0,3-0,5 % Halamid® solution and leave it to take effect for at least 5 min. Rinse with clear water afterwards.

# HALAMID®

## THE UNIVERSAL DISINFECTANT

Halamid® is a registered trademark of axcentive SARL.

Usage	Konzentration	Additional information
Surface and building disinfection by spraying	0,5 % - 1 %	0,3 L/m <sup>2</sup>
Surface and building disinfection by nebulization	2 % - 3 %	40 - 50 ml/m <sup>3</sup>
Vehicle disinfection	1 %	
Footbath	2 %	Renew as often as needed
Water system disinfection	0,5 %	Rinse with clear water
Milking equipment disinfection	0,3 % - 0,5 %	Rinse with clear water
Tank and pond disinfection	1% - 2%	
Equipment disinfection	1%	
Net disinfection	1%	
Water treatment - Fresh water raceway ponds	10-20 mg for 1 hour	Can be repeated up to 4 times of consecutive or alternate days
Water treatment - Stagnant water ponds	3 ppm once a week	
Cages, transport boxes	1 %	2 hours exposure time

### LABU CLEAN

Labu Clean - hand cleaner is a premium/high quality washing paste. The viscous cleaner has a balanced ratio of cleaning power and skin protection.

#### Especially suitable for removing:

- organic dirt
- oil
- fat
- graphite
- metallic dust
- lubricants
- and other stubborn dirt

The outstanding cleaning power is caused by a high amount of detergent substances like anionic and nonionic tensides, dispersant, viscosity stabilizer on the one hand and the usage of ground polyurethane on the other hand.

Labu Clean removes dirt deep pore and completely without usage of solvent.

Because of the high amount of skin care components the skin gets groomed and protected from draining. Labu Clean gets its fresh and enjoyable fragrance from

naturally pressed orange oil. Furthermore Labu Clean is pH-adjusted and over 90% biodegradable.

Product completely conforms the requirements of the EU-cosmetics directive.
